(only for KitKat and lower versions of Android) Speed upload and download option to display upload and download speed in separate notifications. Warning: Do not move this app to SD card. It will stop (Force Close) when you remove the card. This app gives you a non-intrusive, real-time indicator of your data/usage speed in your status bar. I HIGHLY RECOMMEND anyone who have ever found the same thing holding their arm out trying to get a better signal. This is VERY useful when in uneven areas. It even helps me determine which wifi signal is best or if it would be better to turn off wifi and use cell towers. Instead of just complaining that a video or web pages don't load and not knowing if anything I do is helping. (9:07) • Enter the data of a total station to tie up some corners of the building and perform additional control. Hp35s Cogo Survey Programs (7:28) • Learn how to enter tape data around the base of a home. I can easily see if holding the phone in a different place increases the speed and by how much. This app gives you a non-intrusive, real-time indicator of your data/usage speed in your status bar. I HIGHLY RECOMMEND anyone who have ever met his arm out trying to get a better signal. This is VERY useful when in uneven areas. It even helps me determine which wifi signal is best or if it would be better to turn off wifi and use cell towers. Instead of just complaining that a video or web pages don't load and not knowing if anything I do is helping. I can easily see if holding the phone in a different place increases the speed and by how much. It's amazing at 8 I can say it's so amazing, so so amazing and I text oh it's not so amazing that I can't its features, but it's so amazing so amazing that it's so simple that everyone can handle it all that is appropriate for every child not all kids, but every child can handle it so amazing so amazing. I think everyone should use this app to measure the Internet or no internet message for tracking internet usage is so amazing and I tell you that every soul everyone should use this app for clutter this is only 1MB. A person who has no money or was poor who do not have an Internet package that can only use this is only 1 MB that they can do it without wifi or take a small package and download it is very simple that you should tell your friends to download is so that I can not say thank you for reading my opinion.
